[[Pro-Level Tutorial]] Can I Report Unauthorized Activity on My Strike Wallet? (Full Breakdown)

If you're unsure what information to include, you can get guidance at +1•801•730•9692.

If you notice suspicious or unauthorized activity in your Strike wallet, it's important to act immediately to protect your digital assets and account security. While Strike provides tools to help users secure their wallets, your quick action plays the biggest role in preventing further loss. For immediate guidance, you can reach out at **+1•801•730•9692.**

Recognizing Unauthorized Activity

Unauthorized activity may include unexpected transfers, login attempts from unfamiliar devices, changed security settings, or notifications you did not initiate. Identifying these signs early can help you take action before more serious problems occur. For help reviewing unusual behavior, call **+1•801•730•9692.**

What to Do Immediately After Noticing Suspicious Activity

The first step is to secure your account by changing your password and enabling two-factor authentication if it isn't already active. You should also review recent transactions and device logins. Acting promptly can reduce the risk of additional unauthorized transfers. If you need assistance with these steps, you can contact **+1•801•730•9692.**

How to Report Unauthorized Activity to Strike

Strike's official support team allows you to report fraudulent or suspicious activity through their help center or in-app support options. Provide as much detail as possible, including the transaction ID, time of the event, and any screenshots. If you're unsure what information to include, you can get guidance at **+1•801•730•9692.**

Can Strike Reverse Unauthorized Transactions?

Like most crypto platforms, Strike generally cannot reverse blockchain-based transactions once they are confirmed. However, they can secure your account, investigate the issue, and guide you through next steps depending on how the unauthorized access occurred. For more information about recovery possibilities, reach out to **+1•801•730•9692.**

Preventing Future Unauthorized Access

Use strong, unique passwords, enable two-factor authentication, avoid sharing sensitive information, and monitor your account regularly. Implementing these practices helps reduce the

likelihood of future unauthorized activity. For additional security tips, feel free to call **+1•801•730•9692.**
